|                                                                                                                          | Currentnet Version <b>V7.0</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  | <a href="#">Latest Version</a> |                                            |                                                             |
|                                                                                                                          | <div>- Complete and consistent roadmap for newcomers: What to solve &amp; algorithms to learn in order</div> <div>- In the bottom row, there are different sheet pages such as Faq, Topics, CF-C2</div> <div>- CF-C1, C2 are (Codeforces Div2 C problems (or similar level from other OJs), but from easy to hard). Same for CF-D1, D2, D3</div> <div>- Covering most of topics needed up to codeforces Div2-D</div> <div>- Problems of scales 1 - 5.5 / 10 + Few harder ones</div> <div>- Problems increase in difficulty per topic with intermediate easy/medium problems + ad-hoc problems</div> <div>- Speed problems to maintain speed goals</div> <div>- A lot of recorded videos for problems solutions, especially for the entry levels (Arabic)</div> <div>- Several students followed its order and managed to solve by themselves 95% of it (up to his current sheet page)</div> <div>- You can train in one of the following ways:</div> <div>- A) <b>Blind-Order training style</b></div> <div>- Problems are distributed in sheets CF-A, CF-B, CF-C1, ....CF-D3</div> <div>- This one is a roadmap. It targets learning the knowledge/skills in a consistent and balanced way</div> <div>- Every sheet page is on average harder than the previous sheet page</div> <div>- This is my <b>recommended</b> way, though most camps/training-approaches don't use this style</div> <div>- B) <b>Topics-Based training style</b></div> <div>- See sheet page (Topics1). It has the same sheet problems (CF-A to CF-D3) ordered by category and level, around 950 problems</div> <div>- <b>Ideas Quality column</b>: P5 (important), P4(very interesting), P3(interesting), P2(good), P1(ok), Empty (normal)</div> <div>- Say your level is 6/10, and solved a problem of level 3 with P5, you will find it a normal one. So notice, it is subjective to your level/background</div> <div>- You can train using Blind-Order, and use Topics page as guide to skip some problems</div> <div>- Many guys/training camps are fan of this topics-based way.</div> <div>- You need to be careful with such style as it may corrupt your training quality, e.g. due to your bias</div> <div>- Advantage: Mastering the algorithm till solving some hard problems in a short time</div> <div>- Disadvantage: Discovering the algorithm behind the problem is an important skill. Given that you know the topic, you lose a good space to improve this skill</div> <div>- Disadvantage: Being in the mode of specific algorithm lets you solve many of it easier. However, when solving in real contests, your mind is not so active on the specific topic</div> <div>- It is still a good training roadmap. Actually used by most of people I think.</div> <div>- See Topics2 page (for extra topics/problems in specific cases)</div> |  |                                |                                            |                                                             |
| What is this Sheet?                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |                                |                                            |                                                             |

|                                                                                                                          | Don't let a problem consumes more than 2-3 hours. If can't solve it, see editorials/solutions. If still can't solve it, just leave it for now.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |                                |                                            |                                                             |
|                                                                                                                          | Don't compare yourself with others. People vary in their progress                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |                                |                                            |                                                             |

|                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Thanks</b> for all guys who sent sheet feedback: Mariam Alshereef, Magdy Hassan, Ahmed Yasser, Ahmed Elsayed Awad, Mohamed Nasser, Mostafa Ali Mansour, Aya elymany, Ayyad shenouda, Others. |
| Special Thanks for Coach Alhussain Aly for his continuous help                                                                                                                                  |
| Special Thanks for All volunteers in videos recording / Editorials writing                                                                                                                      |

**Q) What is the sheet requirements? Should I study algorithms and Data structures?**

- ONLY programming skills (e.g. Programming 1 level). It is highly advised to implement 2-3 projects
- NO for OOP
- NO for datastructures, but learn STL (or Collections in Java/C#). It helps alot
- NO for algorithms, the sheet will teach you that in a smooth way
- For C++ guys (and others as guide) - first 18 videos here: <https://www.youtube.com/playlist?list=PLPt2dINI2MIZPFq6HyUB1Uhxh1UDnZMS>

**Q) How much time do I need to finish the sheet?**

- Answer varies from one to another.
- Some trainees are fast through whole sheet
- Some trainees are slow through whole sheet
- Some trainees are fast in early pages, but slow at the end
- Some trainees are slow in early pages, but fast at the end
- The sheet has ~900 problems. Around 60 videos. Problems targets average guys. However, you are encouraged to skip problems whenever you could. I expect many guys could skip 20%-30% of the mandatory problems. Make use of the Topics page.

215 problems of level <= 2.5 (avg 20 min per problem)  
93 problems of level <= 3.5 (avg 30 min per problem)  
270 problems of level <= 4.5 (avg 40 min per problem)  
178 problems of level <= 5.25 (avg 60 min per problem)  
127 problems of level <= 5.75 (avg 75 min per problem)  
53 problems of level > 5.75 (avg 90 min per problem)

$215 \times 20 + 93 \times 30 + 270 \times 40 + 178 \times 60 + 127 \times 75 + 53 \times 90 = \sim 700$  hours (say max 900 hours)

If you trained in the summer vacation seriously for 2 month (e.g. 10 hours \* 30 days \* 2 month = 600 hours) + the remaining of the year effort, you could solve the whole sheet smoothly and move to Div2-E level goal

- <https://ask.fm/mostafasaad87/answers/144907000290> [adjust to whatever fits with you]

**Q) When should I give up and check the editorials and solutions?**

<https://ask.fm/mostafasaad87/answers/144907000290>

**Q) Got WA, should I check directly the test cases?**

- No, remember in a real contest you only know your problem status (WA, TLE, ...etc)
- Struggle to find the wrong case by yourself. At least 15-30 minutes.
- Don't keep trying longer, just check the test cases
- If you can write a brute force solution for your problem, write a stress test: Generate random cases and compare the optimal algorithm with the brute force case

**Q) What is the debug time?**

- Once you finish coding and start testing, you verify if the program is working as expected or not
- If not, there are bugs that you need to find to make the program behave as expected. From this moment till getting the program AC = debugging time
- People could debug using 'print statements'. A better way using a debugger
- Check out these 4 videos: <https://www.youtube.com/watch?v=DlbQwQEiDW0&t=0s&index=35&list=PLPt2dINI2MIZPFq6HyUB1Uhxh1UDnZMS>

**Q) Should I solve every problem?**

- Generally, preferred, but If you think certain level is easy (e.g. solve it within 15 minutes), then jump a block and so on
- This jumping might be for codeforces problems only

**Q) Just started in Div2-A, could I finish its codeforces problems first, then solve the UVA/Colored problems?**

- Many juniors find UVA problems in Div2-A hard, I understand
- Yes, almost same for Div2-B. But don't do that in next sheets as order might matter, because all of such knowledge are mainly preparations for hard Div2-B or Div2-C
- However, following the order is a much better idea
- Similarly, one could finish All Div2-A/Div2-B codeforces problems, then solve their colored problems. Again, this is not the best way.

**Q) Is using C# ok?**

- Generally yes, but you won't be able to submit in UVA judge, as C# is not supported
- For such problems, write your code, but heavily test it. You may download an internet code and evaluate the test case on both
- On the other hand, learning Basic C++ + STL is not hard for C#/Java guys
- C++/Java/Python are official in UVA
- Codeforces allows more such as Javascript

**Q) When I watch a video, should I solve the problems in its info section?**

- No, sheet has subset of these problems already in specific order
- Sheet is self-contained

**Q) I watched the video, but it is hard, any tips?**

- Algorithms are hard, learn to struggle
- Watch the video 2-3 times, try to rewrite its code by yourself
- Still can't get it? Google for more materials from the web (ppt/pdf/videos) and try to learn
- In worst case, leave it for now and return to it later

**Q) How does your sheet prepare for ECPC/ACPC?**

- The sheet prepares you to reach level 5-5.5/10 in several categories
- If a team of 3 members solved the whole sheet, they may rank in the top 15 in the contest

But let's go in details. Individual success in contests depends on several factors. Let me state some of them.

- Solving many problems of good quality
- Improving your different skills (reading, thinking, coding and accuracy).
- 2 persons could solve in training the same problem. One got it in 20 min first submission, and the 2nd needed 90 minutes due to 60 minutes debugging.
- Healthy training: Regular / good times for training (e.g. morning) / weekly contests / reading other codes / collaboration with others / etc
- Stress management during contests
- Emotions management when fail in solving or feel performance is not improving enough
- Avoiding Psychological issues: Comparing to others, Negative feelings, Your image, Regretting training time

Moving toward a team contest, you need more concerns:

- Serious team members. If only one active member, they may end up in bad performance. So EACH team member need to finish the sheet individually + weekly contests
- Tolerating team mistakes during the contest
- PC management
- Suitable strategy + several team contests to tune it

As you may notice, there are MANY factors for success.

- This sheet provides you with high quality problems and good topics distribution + way to record your stats to know your weak points
- However, there are many concerns that YOU have to tackle by yourself and your team members

- Finish up to CF-C2 sheet, then study from the "Cracking the Coding Interview: 150 Programming Questions and Solutions" book
- Also watch: <https://www.youtube.com/watch?v=39vqarATPyM>

**Q) How different is your sheet versus Ahmed Aly Ladders?**

- Ladder problems are selected automatically, no personal investigation for the actual benefit/need from the problem
- Mine is mixed between automated and manual.
- At the current moments, many of my trainees and students feedback, I am aware of the problem level and its category.
- I updated the sheet many times because of the received feedback
- My sheet involves the algorithms videos to learn, in order, while you grow up.
- I selected videos to prepare you as soon as possible for Div2-C/Div2-D where many algorithms starts to appear
- It is a sheet..ready for you to record your times, notes...etc...this help to improve yourself
- It is not blocking style. If you can't solve problem, just leave it and move to other one. In ladders, you see next problem when solve current one (or do workarounds)

#### Q) How did you **select problems** for the sheet?

- Long story, many versions were there, from a version to another improvements were applied
- Codeforces problems where rated based on this CF tool: [http://codeforces.com/blog/entry/46304?mobile=true#\\_=\\_](http://codeforces.com/blog/entry/46304?mobile=true#_=_)
- Any rating is just an estimation. I found this one a pretty reasonable measure
- The videos are selected such that when comes to Div2-C/, you are ready
- Manual selections and investigations for non-CF problems to be used in the sheet
- Lots of manual efforts and investigations and feedback processing

#### Q) what is the next step **after finishing** your sheet ?

- Joining directly my ICPC semi-seniors supervision, **BUT**
- Email me with your online sheet copy link and it **must** have
- Each row should have: code link, time details, problem level, category and comment per a problem
- I will review and decide
- Side note: If you started in Div2-C1 and solved first 15 problems, you can share the sheet with me to follow your updates

#### Q) can't **access** the sheet in **edit** mode?

- Don't download the sheet, Work over it online "better"
- Can't edit it? Because it is read-only. Read below notes.
- Just make a copy to your google driver
- Then work over it online. Following are the details
- Login to ur google Gmail
- Go to my sheet
- In the sheet click on 'file' menu
- select Make copy
- it will create copy for u
- RENAME it to Junior Training Sheet
- Now the copied sheet is opened for you (or go inside ur Google drive and you will find it)

NOTE: If u did so and still read-only format, then you are again opening my sheet (e.g. with old name), NOT your copy

#### Q) What to write in the **category** column?

The algorithm used to solve a problem. In Div2-A, this might be:

- This column is for the algorithm you used during solving. Usually, new guys in CF-A are confused. If so, leave it CF-A and start to write in CF-B
- The more you go in the sheet you will learn algorithms (e.g. Binary search, DP, DFS, etc). Then this what you write in level column
- The problem that has no algorithm but a specific idea called ad-hoc, This is the case for most of CF-A and less later
- Implementation: Means the problem request is almost direct, just code it
- Brute Force: Means instead of finding elegant solution, try all possible solutions (e.g. 3 nested loops) and select the solution
- Ad-hoc: Just per-problem thinking in a special way/analysis on how to solve the problem
- Please watch from this minute: <https://youtu.be/DZ6YTtLCE8?t=839>

#### Q) Are problems really sorted based on **easiness**? I don't feel so.

They are sorted by easiness already. But, whatever order, anyone will find some are easy and some are hard in some order.

That is, no one can give you a list that every problem for YOU is easier than the next problem.

In other words, If we gave 100 problems to 10 students of same level to solve and told them rank from easy to hard, they will rank them differently.

So, questions ordered by people average. The promise is, the problems will be within your range to solve.

#### Q) What are these problems **colors**?

See "Problems Colors" notes in info page

#### Q) Are the problems **sorted**?

Yes, but this is tricky as sorting is subjective.

That is imagine 10 prblms given for 100 people to order based on its level, people will arrange in different ways based on their experience

So if you felt they are not sorted, just keep going

#### Q) Why problem-solving is that **important**?

See the first 2 videos here: <https://www.youtube.com/playlist?list=PLPt2dINI2MIaNCuJ070HIAO8JWYBcafuyG>

#### Q) I **feel bored** when solving problems compare to doing projects?

<https://ask.fm/mostafasaad87/answers/145333554402>

#### Q) I would like to **freeze** my study for 1-2 years to be good in problem-solving?

I never liked that. Graduate on time. In your free times and vacations do more problem solving

Relevant: <https://ask.fm/mostafasaad87/answers/145151822818>

#### Q) Topics based-training vs Blind Order

In topics training, we study a topic, then solve a lot of problems over it.

Advantages:

- Mastering the algorithm till solving some hard problems in short time

Disadvantages:

- Discovering the algorithm behind the problem is an important skill. Given that you know the topic, you lose a good space to improve this skill
- Being in the mode of specific algorithm lets you solve many of it easier. However, when solving in real contests, your mind is not so active on specific topic

In my sheets - Blind style:

- You solve 3-5 per topic. Then you have to discover the other problems by yourself. So you train to avoid the missing 2 points

Claim:

- Although topics training let guys be so good early, they level stuck early and they don't improve. Seems to me, topics training is an important factor in doing so. Meanwhile, if you just target to be good in Div2D level in shorter time and no interest in further competitions achievements, you may go topics based.

#### Q) Who Finished my sheet? Their levels?

<https://ask.fm/mostafasaad87/answers/150802497762>

#### Q) How to share my sheet progress with you?

<https://ask.fm/mostafasaad87/answers/148552940002>

Q) What is after the sheet?

- There are 2 other levels, each has around 1000 problems. Semi-senior level and seniors level
- Generally speaking, the region stars will solve a lot of problems, e.g. 2000-3000 problems with many of them of hard level
- Whoever finish the sheet, I join him in my supervision for the next levels

| Problem Name     | Problem Code                 | Status | Submit Count | Reading Time(m) | Thinking Time(m) | Coding Time(m) | Debug Time(m) | Total Time(m) | Problem Level /10 | By yourself? | Category | 1-2 line Comments About your approach                                                                                                                                                                                                                        |
|------------------|------------------------------|--------|--------------|-----------------|------------------|----------------|---------------|---------------|-------------------|--------------|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                  | AC Averages =>               | 3      | 2.3          | 5               | 13               | 15             | 18            | 50            | 2                 | 2            | 2        | 2                                                                                                                                                                                                                                                            |
| Sample Name1     | Sample Link1                 | AC     | 5            | 4               | 8                | 6              | 32            | 50            | 2                 | Yes          | Math     | Solution in mind is O(n^2): for each pair of points, get the equation of the straight line linking between them, and add 2 to its count. Print the count of the line having the max count. Problem is how to hash a line equation (coefficients are double). |
| Sample Name2     | Sample Link2                 | AC     | 1            | 5               | 10               | 35             | 20            | 70            | 2                 | No           | Impl     | <b>My Performance Notes:</b> This is so bad performance. He thought for little time and continued thinking while coding. As a result, much debug time too. RULE: <b>Think More, Code Faster</b>                                                              |
| Sample Name3     | Sample Link3                 | AC     | 1            | 5               | 20               | 4              | 1             | 30            | 2                 | Yes          | Graph    | Please always write and study your timings.                                                                                                                                                                                                                  |
| Sample Name4     | Sample Link4                 | WA     | 5            | 4               | 25               | 20             | 2             | 51            | 7                 | Hint         | Math     | <b>My Performance Notes:</b> This is so good performance. 1st submission. Thinking is the higher. Code/Debug is so low. By time, thinking column will be improved.                                                                                           |
| Sample Name5     | Sample Link5                 | CS     | 6            | 5               | 30               | 25             | 31            | 91            | 9                 |              |          | Other Status values: AC, WA, CS, TLE, MLE, RTE, ... These values and comments are just examples. Just remove/ignore them.                                                                                                                                    |
|                  |                              |        |              |                 |                  |                |               | 0             |                   |              |          | Want c++ solution for UVA 408? Google with: UVA 408 filetype:c++                                                                                                                                                                                             |

|                      |                                                                                                                                      |
| Reading              |                                                                                                                                      |
|                      | Read within 3-5 minutes for short text problem. If no, you need to work on your Reading English Skills                               |
|                      | Never suspect later your problem understanding? If happens, you need to improve your comprehension / cases tracing                   |
| Thinking             |                                                                                                                                      |
|                      | Ready and in the challenging mood before start solving.                                                                              |
|                      | <a href="#">Striving against the problem for a reasonable time. If no, you need to change your solving spirit. Be a fighter.</a>     |
|                      | Found a solution; Do verifications: text cases / extra cases / correctness / time & memory                                           |
| Coding               |                                                                                                                                      |
|                      | Sketch in your mind the big picture of the code first. Don't rush for coding                                                         |
|                      | Code within 10 minutes. If more, you have coding skills problem or your understanding for the approach is not complete               |
|                      | A lot of copy paste? Something wrong. Need a better code organization                                                                |
|                      | Needed more than 10 minutes to code medium size codes? Why? Identify the issue and solve it                                          |
| Debugging            |                                                                                                                                      |
|                      | Which will be faster to catch the mistake? Printing or Debugger                                                                      |
|                      | Don't know how to use a debugger? Learn this skill                                                                                   |
|                      | Needed more than 10 minutes to solve bugs? Something is wrong. Why need all this time? How to solve this issue?                      |
| Code is ready!       |                                                                                                                                      |
|                      | Just submit and see if passed? Wrong. Behave as if you are in the real contest. Are you almost sure it will be AC? If yes, submit    |
|                      | TRAIN offline as if you are in a real contest. This shortens the gap between training and the real contest                           |
| Code Failed :(       |                                                                                                                                      |
|                      | Are you nervous / frustrated? Yes => Wrong behavior. Take it easy                                                                    |
|                      | Rush to test cases? Yes => Wrong, revise idea, then code, then trace more samples. Try for 15 minutes or more first                  |
| Got it AC            |                                                                                                                                      |
|                      | Read and Understood editorial solutions?                                                                                             |
|                      | Checked 1-3 other AC solutions?                                                                                                      |
|                      | Tried to write a much shorter version of your code?                                                                                  |
|                      | Tried to write a faster coder (better complexity)?                                                                                   |
| Speed                |                                                                                                                                      |
|                      | How much time do you need in Div2-A/Div2-B? Target (5, 10) minutes for semiseniors, (3, 6) for seniors                               |
|                      | Not that fast? You need regular speed training on easy problems                                                                      |
| Weakly contests      |                                                                                                                                      |
|                      | Do you participate in 1-2 contests per week at least? If no, this is bad. Offline training != Online contests                        |
|                      | You need to train yourself to behave in online contests similar to offline training. This is an important skill.                     |
| Sheet stats          |                                                                                                                                      |
|                      | Recorded them? Yes: read your problem's row. Where do you consume the most of the time? These are your weak skills                   |
|                      | No, I don't record! => How will you know your weak points?!                                                                          |
|                      | Can't record timing as I am mixing thinking with coding? => Wrong behavior. get done with thinking, then move to coding. Don't cycle |
| Training Time        |                                                                                                                                      |
|                      | Is it regular and scheduled? Yes => you will have regular improvements.                                                              |
|                      | Your plan was to train X hours, Did so? If no, why?                                                                                  |
|                      | Without regular and continous training, your mind might not improve well                                                             |
| Training with?       |                                                                                                                                      |
|                      | Yourself only? You may feel bored. If can collaborate with others = longer commitment                                                |
| Psychological issues |                                                                                                                                      |
|                      | Do you keep comparing yourself with others?                                                                                          |
|                      | Do you have negative feelings? Like I am stupid...I am hopeless...I will never have a comparable level...?                           |
|                      | Do you think of your image/appearance if failed in online contests so avoid contests?                                                |
|                      | Do you use another account with a weird name to train so that people don't know about your progress/failure?                         |
|                      | Do you wish your friends fail in the contest? or get annoyed with their better performance?                                          |
|                      | Do you avoid teaching your friends something or give no support to remain better than them?                                          |

|  |                                                                                                      |
|--|------------------------------------------------------------------------------------------------------|
|  | Do you feel bored/frustrated as no/weak community in your college?                                   |
|  | Do you keep training day and night without breaks? No socialization at all?                          |
|  | Do you hate specific topics and avoid them (probability/geometry)?                                   |
|  | 'Should I stop' Dilemma? Keep thinking is it worth vs a waste of time?                               |
|  |                                                                                                      |
|  | If any of the above questions is YES, you probably have a problem and need to find a solution to it. |

[7] From a trainee: txt clarification: In this problem FJ can actually REARRANGE the plots and then groups them. \* I misunderstood the statement by the word 'successive'
